Qui eaque repudiandae sint nerspiciatis

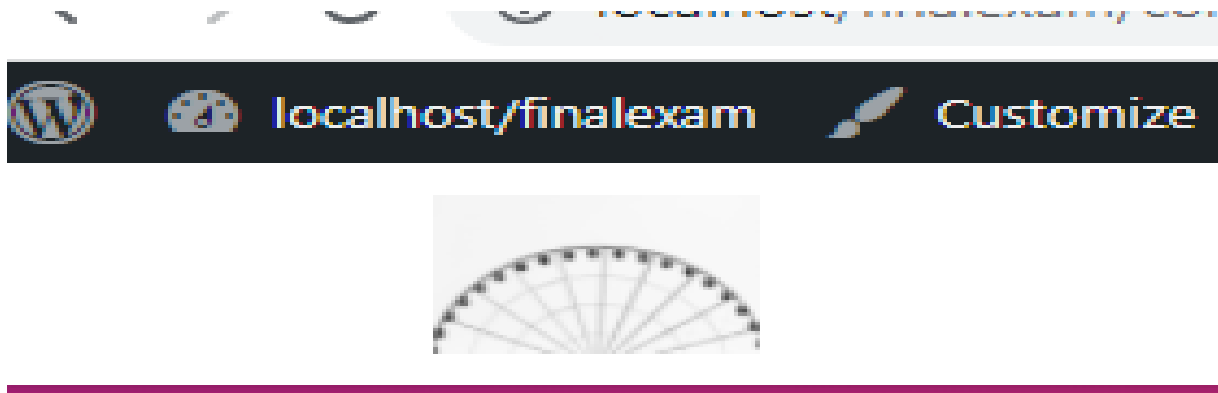

5. Create three pages namely Home, About US and Contact US.

6. All the pages should have a header, footer respectively.

7. Give a logo to your page and integrate it.

8. Create atleast two categories for your page's posts.

The screenshot shows the WordPress 'Add New Category' interface. On the left is a sidebar with navigation links: All Posts, Add New, Categories, Tags, Media, Pages, Comments, Appearance, Plugins (1), Users, Tools, and Settings. The main content area has a form for adding a new category with fields for Name, Slug, and Parent Category (set to None). Below the form is a description of categories. To the right, there are two tables showing existing categories. The top table has 3 items and the bottom table has 3 items. Both tables have columns for Name, Description, Slug, and Count.

Name	Description	Slug	Count
<input type="checkbox"/> Exam	—	exam	0
<input type="checkbox"/> Final exam	—	final-exm	0
Uncategorized	—	uncategorized	7

Deleting a category does not delete the posts in that category. Instead, posts that were only assigned to the deleted category are set to the default category: Uncategorized. The default category cannot be deleted.

9. Have the 5 major template files integrated to your project.

There five template files for my project/final exam

The screenshot shows the WordPress 'Pages' screen. The left sidebar has navigation links: Posts, Media, Pages (selected), All Pages, Add New, Comments, Appearance, Plugins (1), Users, Tools, and Settings. The main content area shows a list of pages with checkboxes for selection. The pages listed are: Title, About Us, Contact Us, Gallery, Home, Login, and Title (with an upward arrow). At the bottom, there are 'Bulk Actions' and 'Apply' buttons.

	Title
<input type="checkbox"/>	Title
<input type="checkbox"/>	About Us
<input type="checkbox"/>	Contact Us
<input type="checkbox"/>	Gallery
<input type="checkbox"/>	Home
<input type="checkbox"/>	Login
<input type="checkbox"/>	Title ▲

10. Change the homepage setting.

11. Edit the theme file by adding a custom css. Change atleast three different css properties.

```
35 =====*/
36 .header-four .header-t {
37     /*background: rgba(228, 191, 182, 0.1);*/
38     background-color: rgba(126, 128, 126, 0.7);
39 }
40
```

12. Add a thumbnail by using hooks.

13. Enable pagination for your posts. (Have 20 posts to test this).
